About Tandem Digital

Tandem Digital is an integrated digital design studio in Hyderabad, India. We strive to design in tandem with customer needs, to create impactful user experiences that help your business grow. We focus on delivering custom design services spanning across all digital platforms. We see digital as a strategy. We use the power of design and technology as catalysts to help digitally transform businesses, create digital products that people love to use and tell your brand story. Our expertise lies in UX and UI Design, Web Development and Digital Marketing.

Job Summary

In this role, you will help us create outstanding websites and applications that are technically sound and adaptable. You'll collaborate closely with the Senior Developer, Design Team, Content Writers, as well as clients and partners in India and abroad, to bring new projects in the roadmap to life, and help market our evolving service offering in new and exciting ways. You will be involved in new projects with a good balance between creating new products and re-architecting existing ones.

You may join us in our office in Hyderabad, India, as we develop fresh new offerings in a startup environment.

What you'll work on

- Deploying page content and integrating data from various back-end services
- Implementation, deployment and maintenance of websites and applications, according to wireframes and prototypes created by the design team.
- Create and maintain software documentation for projects.
- Ensuring that designs are well executed, identify and troubleshoot issues during development, and efficiently transitioned from design.

Who are you?

- You don't only code, but are actively involved in the design process and enjoy the iterative process of developing a product, both aesthetically pleasing and functional.
- You write well designed, testable and efficient code, incorporating industry best practices for development, UX and UI.
- You understand company and project objectives and manage and prioritize work.
- Introvert, ambivert or extrovert, you've got a phenomenal personality and respect for others.
- You enjoy the constant challenges and learning that come with design and development.
- You're not afraid to raise concerns, suggest improvements, or question the status quo.
- You seek to learn from others as well as share your knowledge and experience.
- You're a kind and curious person looking to be a big part of a small team.

What are your skills and experience?

- You have a min of 2 years of experience in Web Development
- You have a Bachelor's Degree in Computer Science, Diploma or equivalent.
- You have a portfolio that demonstrates the technical skills to develop web and mobile applications and sites
- You have a strong working knowledge or experience in modern HTML, CSS, Javascript, PHP, Wordpress (Experience in Shopify, Magento and JS based Frameworks such as React desirable)
- You are familiar with best practices in programming and web development, and have the ability to suggest the best use of them depending on the project, and client needs.
- You communicate effectively in presentations, on video/audio calls or in a chat environment, with users, designers, team mates and clients.
- You have excellent attention to detail, especially to ensure quality of final deliverables.
- You are adaptable and quick to pick up feedback and new techniques to implement.
- You are comfortable working in cross-functional teams in a fast-paced environment, interacting closely with designers during the design and development process, so "handoffs" flow easily and product goals are achieved, including Quality Assurance.
- You can break down a problem into small, achievable tasks, and manage your time effectively.
- You can act on feedback from others and provide helpful feedback to others when needed.

Skills that will earn you brownie points:

- Knowledge of navigating Adobe Creative Suite, prototyping and wireframing tools like Adobe XD, Figma, Sketch, Invision, etc
- Working knowledge of SEO and SEO Tools
- Experience in Web Design and UI/UX Design
